FUNDLENS AUDIT — FINAL REPORT

Sequoia Growth Fund VI, LP - 2023 Review

Venture Capital Fund 8 findings Prepared June 9, 2026 Reviewed June 9, 2026

Partial Audit. Findings reflect only the documents provided; absence of other document types is not treated as a deficiency.

OVERALL RISK

HIGH

QUALITY SCORE

7/10

This is a partial audit of Sequoia Growth Fund VI, LP (2018-vintage VC) based on a single in-scope document: the Q4 2023 NAV report as of December 31, 2023. The fund's capital structure reconciles cleanly (Called $285.5M + Uncalled $64.5M = Committed $350.0M), and core ASC 820/946 valuation disclosures are indicated as present. However, two material concerns warrant attention before any reliance: (1) 100% of the $284.72M NAV is GP-marked Level 3 with no disclosed unobservable-input detail or independent valuation evidence, and (2) the referenced Portfolio Holdings schedule could not be tied to any position-level detail, leaving the NAV roll-up unverifiable; relatedly, NAV approximates cumulative called capital (~1.00x) with no distribution data to assess DPI/TVPI. Document coverage is intentionally limited to the NAV report, so fee, governance, and capital account matters are unassessed rather than deficient. Directionally, valuation and performance risk is elevated and LP-adverse pending receipt of position-level holdings detail, valuation policy, and distribution/return data.

Findings

WARNING InvestmentSchedule · high confidence · Open · Requires verification F-002

The NAV report references a Schedule of Investments ('Portfolio Holdings — Fair Value Detail') and classifies all portfolio investments as Level 3 under ASC 820, yet zero individual investment line items were extracted (investments = []). The $284.72M NAV cannot be tied to any position-level detail, so fair values, cost basis, valuation technique, and unrealized gain/loss cannot be validated, and portfolio concentration (a single position could exceed 30% of NAV) cannot be assessed.

RECOMMENDATION

Obtain and verify position-level Portfolio Holdings detail (company name, cost, fair value, ownership, valuation technique) so that each Level 3 fair value and unrealized gain/loss can be reconciled to the total NAV of $284,720K. Determine whether extraction failed or the section is summary-level only.

"Portfolio Holdings — Fair Value Detail"

NAV_Clean_SequoiaGrowthVI_VC_Q42023.pdf · p.2 · Valuation Methodology and Disclosures
"All portfolio company investments are classified as Level 3 under ASC 820"

WARNING NAV · high confidence · Open · Requires verification F-003

100% of the fund's $284.72M NAV is classified as Level 3 under ASC 820, with no disclosed valuation methodology detail, no evidence of independent third-party valuation, and no disclosure of significant unobservable inputs in the provided NAV report. For a 2018-vintage VC fund, a meaningful share of positions may have been last priced at 2020–2021 financing rounds, leaving GP discretion over the figure that drives reported performance and any fee/carry accrual.

RECOMMENDATION

Request the valuation policy, the date and pricing basis of the most recent mark for each material position (last priced round vs. internal model), the unobservable-inputs table required under ASC 820-10-50-2, and confirmation of whether an independent valuation firm reviews Level 3 marks.

"All portfolio company investments are classified as Level 3 under ASC 820"

NAV_Clean_SequoiaGrowthVI_VC_Q42023.pdf · p.1 · Fund Summary
"Total Net Asset Value is $284,720 thousand for Q4 2023"

WARNING NAV medium confidence Open Requires verification F-004

For a 2018-vintage fund at year 6, total NAV ($284,720K) is essentially equal to cumulative called capital ($285,500K) — a residual value ratio of ~1.00x — and the NAV report discloses no cumulative distributions, so DPI/TVPI/RVPI cannot be assessed. A flat ~1.00x position six years into the strongest pre-2022 venture mark-up cycle, with marks that are 100% GP-controlled Level 3 valuations, would warrant close scrutiny by a sophisticated LP.

RECOMMENDATION

Obtain cumulative distributions, net IRR, and TVPI/DPI/RVPI as of 12/31/2023, and benchmark against 2018-vintage VC quartiles (e.g., Cambridge Associates / Burgiss). Request attribution of which positions drive residual value and when each was last externally priced.

NAV_Clean_SequoiaGrowthVI_VC_Q42023.pdf · p.1 · Fund Summary

"Total Net Asset Value is $284,720 thousand for Q4 2023"

NAV_Clean_SequoiaGrowthVI_VC_Q42023.pdf · p.1 · Fund Summary

"Total Called Capital (cumulative) is $285,500 thousand"

INFORMATIONAL GAAP_ASC946 medium confidence Open F-005

Within the provided NAV report, the fair value hierarchy (Level 3 per ASC 820), ASC 946 investment company guidance citation, financial highlights, and schedule of investments are indicated as present. However, subsequent events disclosure and related-party transaction disclosure status could not be determined from this document (both null). These are standard footnotes in a complete financial statement; their presence cannot be confirmed from a NAV report alone.

RECOMMENDATION

Request a subsequent events representation through the report issuance date and an affirmative statement on related-party transactions, cross-fund holdings, and affiliated service providers. No action needed for the current NAV-report-only scope.

NAV_Clean_SequoiaGrowthVI_VC_Q42023.pdf · p.1 · Portfolio Holdings

"Investments are valued in accordance with ASC 820 and ASC 946"

INFORMATIONAL FundTerms medium confidence Open F-007

The fund has called 81.6% of commitments ($285.5M of $350M) with $64.5M uncalled at year 6 of the fund's life; the NAV report does not state whether the investment period remains open or on what basis remaining capital may be called. A standard 5-year investment period from a 2018 vintage would have expired in 2023.

RECOMMENDATION

Confirm investment period status, permitted uses of the remaining $64.5M uncalled capital (follow-on reserves, fees, or new investments), and any recycling provisions affecting LP unfunded exposure.

NAV_Clean_SequoiaGrowthVI_VC_Q42023.pdf · p.1 · Fund Summary

"Total Uncalled Capital is $64,500 thousand"

INFORMATIONAL CapitalAccounts · medium confidence · Open F-008

The NAV report presents only a fund-level NAV total with no per-unit NAV and no LP capital account detail; the structured output contains no capital accounts to reconcile against the $284.72M total, and no GP capital account line is shown.

RECOMMENDATION

Request the capital account roll-forward (beginning balance, contributions, allocations, fees, distributions, ending balance) by partner class, including the GP's account, and reconcile to total NAV.

NAV_Clean_SequoiaGrowthVI_VC_Q42023.pdf · p.1 · Fund Summary

"Total Net Asset Value is $284,720 thousand for Q4 2023"

PASS FundTerms · high confidence · Open F-001

Capital structure is internally consistent: Called Capital ($285,500K) + Uncalled Capital ($64,500K) = Total Committed Capital ($350,000K). The arithmetic reconciles exactly with zero variance.

RECOMMENDATION

No action required. Commitment utilization (~81.6%) is consistent for a 2018-vintage fund late in its investment period.

NAV_Clean_SequoiaGrowthVI_VC_Q42023.pdf · p.1 · Fund Summary

"Total Committed Capital is $350,000 thousand; Total Called Capital (cumulative) is $285,500 thousand; Total Uncalled Capital is $64,500 thousand"

PASS NAV · high confidence · Open F-006

The NAV as-of date (2023-12-31) is consistent with the stated fiscal year end (2023-12-31), and the reporting currency is USD. No date or currency inconsistency identified within the provided document.

RECOMMENDATION

No action required.

"Net Asset Value Report for Q4 2023 as of December 31, 2023"

Cross-Document Checks

Commitment reconciliation: Called + Uncalled = Committed

PASS

EXPECTED Called ($285,500K) + Uncalled ($64,500K) = Committed ($350,000K)

FOUND $285,500K + $64,500K = $350,000K

Variance: $0

NAV equals sum of LP ending capital account balances INFORMATIONAL

EXPECTED Sum of LP ending capital accounts = Total NAV ($284,720K)

FOUND No capital account statements were provided (capitalAccounts = []); the per-LP detail cannot be summed.

Sum of investment fair values reconciles to reported NAV WARNING

EXPECTED Sum of portfolio holding fair values + net other assets/liabilities = NAV ($284,720K)

FOUND No investment line items were extracted (investments = []) despite the schedule being referenced; reconciliation not possible.

Fee/carry/preferred-return rate consistency across LPA, PPM, and footnotes INFORMATIONAL

EXPECTED Management fee rate, carry rate, and preferred return consistent across documents

FOUND No fee terms present in the provided NAV report (all feeTerms fields null); no LPA/PPM in scope to compare.

PBC Document Requests

- HIGH Please provide the complete position-level Schedule of Investments as of 12/31/2023, including for each portfolio company: name, cost basis, fair value, ownership percentage, valuation technique (cost, last round, OPM, PWERM), and unrealized gain/loss, summing to the reported $284,720K NAV. — Fund Administrator
- HIGH Please provide the fund's valuation policy, the date and pricing basis of the most recent mark for each material position (last priced round vs. internal model), the ASC 820-10-50-2 significant unobservable-inputs table, and confirmation of whether an independent valuation firm reviews Level 3 marks. — General Partner
- HIGH Please provide cumulative distributions to LPs and fund performance metrics (net IRR, TVPI, DPI, RVPI) as of 12/31/2023, with attribution identifying which positions drive residual value and the date each was last externally priced. — Fund Administrator
- MEDIUM Please provide the LP capital account roll-forward by partner class (beginning balance, contributions, allocations, management fees, distributions, ending balance), including the GP capital account, reconciled to total NAV of $284,720K. — Fund Administrator
- MEDIUM Please provide confirmation of the investment period status as of 12/31/2023 and the permitted uses of the remaining $64.5M uncalled capital, including any recycling provisions affecting LP unfunded exposure. — Legal Counsel
- MEDIUM Please provide a subsequent events representation through the report issuance date and an affirmative statement on related-party transactions, cross-fund holdings, and affiliated service providers. — General Partner

Recommended Next Steps

1. Obtain position-level Portfolio Holdings detail and reconcile to the $284.72M NAV before placing any reliance on the reported figure. immediate
2. Request the valuation policy, marking dates, unobservable-inputs disclosure, and independent valuation evidence supporting the 100% Level 3 NAV. immediate
3. Obtain cumulative distributions and performance metrics (net IRR, TVPI/DPI/RVPI) and benchmark against 2018-vintage VC quartiles. near term
4. Confirm investment period status and the authority/purpose for calling the remaining $64.5M uncalled capital. near term
5. Obtain capital account roll-forward and subsequent events / related-party representations if audited financials come into scope. before finalization

Document Set

This is a partial audit performed at the user's election. Only the Q4 2023 NAV report (NAV_Clean_SequoiaGrowthVI_VC_Q42023.pdf) was in scope. Document types typically reviewed for a VC fund — audited financial statements, capital account statements, the LPA/PPM, valuation policy, and performance reporting — were not included in this audit scope and are therefore not treated as deficiencies; they are noted only to frame coverage. Findings and scores reflect only the in-scope document.
